Rational Choice

Key tenets:

- Models and deductive reasoning
- Methodological individualism
- Instrumental rationality

EVSS/PUBA 602 Public Policy

Rationality

Group Choic

Institutions

Rational Choice

Instrumental Rationality

- Assumptions
 - Individuals have preferences (about outcomes)
 - Individuals act (choose an instrument) to achieve those preferences, but are faced with uncertainty
 - Beliefs connect instruments to outcomes
 - Instrumental rationality: Individuals act in accord with preferences and beliefs

Institutions

Rational Choice

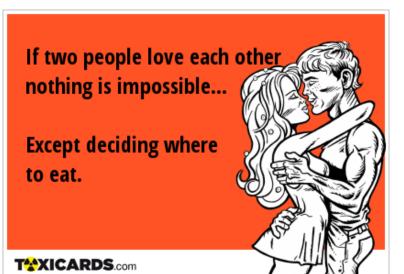

Rationality and Maximization

- Assumptions
 - Individuals rank order preferences over alternatives
 - Completeness: For any pair of alternatives, individuals prefer one to the other or are indifferent
 - Transitivity: Preference rankings are consistent
 - Ordering principle: Completeness and transitivity allow individuals to order alternatives from highest to lowest based on preferences
 - Maximization: Choosing from the top of the preference ordering

Group Choic

Institutions

Institutional Rational Choice

- Policy as collective decision-making by rational individuals within institutions
- Institutions: "The rules of the game"
 - Rules that influence choices, often producing an *equilibrium*: regular pattern of behavior
- Institutions:
 - Solve collective action problems
 - Reduce transaction costs
 - Aggregate individual preferences

EVSS/PUBA 602 Public Policy

Rationality

Group Cho

Institutions

Institutional Rational Choice

- Components of Institutions (*Shepsle and Bonchek* pgs. 299-311)
 - Division of labor and regular procedure
 - Specialization of labor
 - Jurisdictions
 - Delegation and monitoring (Principal-agent problem)

EVSS/PUBA 602 Public Policy

Rationality

Group Cho

Institutions

Institutional Rational Choice and the Bureaucracy

- What is Niskanen's model?
 - Public servants seek to maximize their budgets
 - The bureaucrat has private information (knows it's TC)
 - Bureaus that seek budgets as large as possible produce too much
 - Therefore public bureaucracies are too big, budgets too large, output more than society wishes

EVSS/PUBA 602 Public Policy

Institutions

Institutional Rational Choice and the Bureaucracy

Principals and Agents

- Principals: Grant policymaking authority (e.g., Congress)
- Agents: Receive policymaking authority (e.g., Bureaucracy)
- The problem(s):
 - Information asymmetry
 - Preference differences
 - Drift

EVSS/PUBA 602 Public Policy

Rationality

Group Choice

Institutions

Institutional Rational Choice and the Bureaucracy

Principals and Agents

- Solution(s):
 - ex ante controls
 - Appointment control
 - Procedural control
 - ex post controls
 - Budgets
 - Monitoring
 - Police patrol
 - Fire alarms
